

AWR Lloyd

## **AWR Lloyd launches new market intelligence service on natural resources and infrastructure in Asia and the Pacific**

‘The Pearl’ is AWR Lloyd’s new market intelligence and research service focused on Asia-Pacific’s natural resources and infrastructure sectors. We aim to provide specialized and insightful analysis with distinct equity capital markets and corporate finance strategy perspectives. The name of the new service comes from our dragon’s pearl of wisdom.

The Pearl consists of monthly industry news, research and analysis for key sectors in Asia-Pacific plus ad hoc reports on specific themes (industry, country, stock market or company related). The latter can be tailored to client requirements on a case by case basis.

The monthly industry reports available on a quarterly subscription basis are currently:

- **Coal Focus:** thermal and metallurgical coal.
- **Upstream Oil & Gas Focus:** oil and gas exploration and production.
- **Downstream Oil Focus:** refining, petrochemicals, storage, logistics, trading and distribution.
- **Clean Energy Focus:** solar, wind, hydro, biomass, bio-fuels and clean energy technologies.

The industry monthly reports have a Southeast Asia focus but with additional analysis of the industries and players in the wider Asia-Pacific region – and with reference to the global context in each case. Importantly, subscribers to the industry monthlies will have a basic level of access to AWR Lloyd industry and country specialists via email and conference calls during the year for short consultations. Additional consulting services are available subject to negotiation.

The Pearl will be available via email and through the firm’s website ([www.awrlloyd.com](http://www.awrlloyd.com)).

AWR Lloyd is an independent strategy consulting and corporate finance advisory firm focused on Asia and the Pacific’s natural resources, strategic industries and infrastructure sectors. The firm was established in 2000 and has offices and representation throughout the Asia-Pacific region.
